

Flocké by 3-G Mermet—Opaque fiberglass base material from one of Europe’s premier weavers. White exterior with a choice of 15 interior colors. Room side of fabric has a soft woven finish, unlike most blackout fabrics. Perfect for areas requiring opaque shades with an elegant look. 78" roll width. Rot proof and fire retardant, meeting NFPA 701 small- and large-scale standards. Additional colors, not pictured: Mangué (mango) MF1611, Pistache (pistachio) MF1610, Soleil (gold) MF1607, Seychelles (turquoise) MF1612, Chêne (brown) MF1617.

“T” Screen by 3-G Mermet—High quality woven mesh for interior shades. PVC coated fiberglass in 20 stock colors. Note: “T” Screen fabric has a lighter side and darker side allowing the benefits of both light and dark yarns in one fabric. “T” Screen can control both glare and heat, while still maintaining a view of the outside world. The most efficient use of “T” Screen is having the darker side face your interior with the lighter side toward the outside. When specifying, indicate which faces room interior. 98" roll width. Available with a 3% openness factor (style 5130), 5% openness factor (style 5100), and a 10% openness factor (style 5110). Slat hems are heat-sealed. Flame retardant: meets both NFPA 701-96 small- and large-scale standards. *Pictured below are fabric samples in style 5100 showing the dark side (on the left) and the light side (on the right). Specify which side you prefer to face interior. Style 5100 appears more dark in comparison to the 5110 in the same color, due to the tighter weave in the 5100—the more dense a fabric is, the darker the appearance.*

“E” Screen by 3-G Mermet—High quality basketweave mesh from a premier European weaver. PVC coated Fiberglass in nine stock colors. 98" roll width. Average openness available in 6% and 10%. Slat hems are heat sealed. Flame retardant: meets both NFPA 701 small- and large-scale standards.

SunBloc Series SB9000—SunBloc—whenever true opacity is required. Perfect for rooms where audio visual presentations are made. Close-woven Fiberglass is sandwiched between layers of sun-resistant vinyl. Flame retardant. Specify SunBloc in any of 13 opaque colors: 7 duplex (with white exterior), and 6 with the same color inside and out. Use SunBloc as part of a Lightbloc Shading System when total darkness is needed. Also available, but not shown—SB9170 Black/White.

Suitable for use in LightBloc FlexShades and Skylight FlexShades,
as well as in any other roller-operated FlexShade

Nocturne II—Soft room darkening polyester fabric. White exterior with a choice of 12 interior colors. Suitable for use in folding or roller-operated shades, but not for Skylight FlexShades. 72" roll width. Fire retardant, meeting NFPA 701 small- and large-scale standards; treated for stain resistance. Additional colors not shown: White LNII-1010 and Creme LNII-1030.
